"The Crookes riew is a distinct encouragement to them; and similar views have been put forth before, sometimes apparently in the hope of radising priese. Unfortunately, when assgerated, a temporary rise of 10 per cent. is followed (as the result of natural reaction, and from the effect of increase of area, atmusted by a temporary advance in value) by a fall of 50 per cent. as between 1891 and 1898. MANILA, Dec. 27.—The so-called congress of the revolutionary government of the Filipinos, which has been in session some time at Malalos, has unexpectly adjourned, owing to the difficulty of formulating a constitution. The cabinet of President Aquinaldo, appointed at Bacoor on July 15 last and named in the Bacoor proclamation issued that day, has resigned.

Gen. Aguinaldo, who had been at Malolos, came from there to Senta Anna, a suburb of Manila. He then visited Paterno, and now, it is reported, he has gone to Cavite Vielo, the old town of Cavite. Reliable advices any that while he was at Paterno he was indefatigable in his efforts to overcome the policy of the militant factions which is hostille to the Americana. It is probable that his influence will avail to aver trouble.

He said that there would undonbtedly be trouble in the maintenance of order pending the transfer of the control of affairs from the Spanish government to the United States and the control of affairs from the Spanish government to the United States and the anticipate that it would reach proportions beyond the control of the American forces. According to his representations the feeling between the Spaniards and Cubans is very bitter, a serious rupture between the two factions being averted only by presence of American troops and the knowledge that the American military anthorities are determined to preserve order by the prompt exercise of force in case of necessity.

Washingrox, Dec. 27.—Adm. Walker, chairman of the Niearaguan canal commission, when questioned Monday as to the time when the report of the commission would be sent to congress said that the time could not be stated definitely as the report had not been accommission would be sent to congress said that the time could not be atted definitely as the report had not been accommission could be ready within the next few days. In answer to further inquiries the admiral axid that there was no differences of opinion among the members of the commission, except possibly on the question of cost, and that difference might be adjusted so that the report would be unanimous on all points. Owing to the iliness of Mr. Haines during the last ten days practically nothing had been done, but now that the commission was together again a conclusion on this and other points might be expected soon. Some months ago Adm. Walker stated to a committee of congress that in his judgment the canal would not cost more than \$120,000,000. Another maximum at \$140,000,000, but stated that it might cost considerably less, and it had been the opinion of the third member of the commission that the canal would not cost more than \$00,000,000,000,000. All were agreed, however, that these figures were and could be only approximations. There were too many considerations and contingencies that might change the result materially. An epidemic of cholera-or force; accidents to machinery, or possibly earthquakes, might damage the work in course of construction and while none of these would be likely to happen yet they were among the possibilities and in estimating the cost of the work in course of construction and while none of these would be likely to happen yet they were among the possibilities and in estimating the cost of the work in course of construction and while none of these would be likely to happen yet they were among the possibilities and in restinating the cost of the work are accounsile and abould be prosecuted with all reasonable expedition.
